INCREASE PRODUCTION BY UP TO 15%¹

With buckets up to 3.2 m³ powered by the 350's increased digging force and swing torque, you will be more productive and profitable.

WORK SMART. SAVE MONEY.

Two power modes help you manage fuel consumption for your specific applications: Power mode and the new Smart mode.

Power mode delivers maximum productivity in high-demand applications like truck loading and trenching.

Smart mode automatically matches engine speed and hydraulic power to demand for the highest fuel efficiency in any application.

Use Operator ID and the excavator will remember your mode preference.

CAB TAKES THE HARD OUT OF WORK

Sites where excavators typically work are rugged and challenging. The 350 cab helps protect from fatigue, stresses, sounds, and temperatures of the job.

WE'VE GOT **YOUR BACK.**

BACK PAIN IS ONE OF THE MOST COMMON REASONS PEOPLE MISS WORK.*

NEW CAB:

All controls are in front of the operator. That means almost no twisting is required.

SMART DESIGN

Operator ID remembers your preferred settings for power mode, joystick pattern, and joystick response. Just plug in your password and go to work. Seat adjustments, touchscreen monitor, and controls are conveniently located to reduce reaching and twisting.

ALL-AROUND VISIBILITY

Large windows at the front, sides, and rear give excellent visibility in all directions from the operator seat. Narrow front cab pillars allow a wider field of view to the front. Plus, with the standard rearview camera, operators will always be aware of what's surrounding the excavator.

ACCESS, CONNECTIVITY, AND STORAGE

The available AM/FM radio includes a USB and auxiliary port for connecting and charging devices; a 24V DC outlet makes phone charging even faster. Storage space in front of the controls can hold wide cell phones.

TOUCHSCREEN MONITOR

Most machine settings can be controlled through the high-resolution touchscreen monitor. It offers 42 languages and is easy to reach from the seat – no twisting or turning to reach switches. A handy jog dial control and shortcut keys are also ergonomically positioned on the right console.

SEAT AND CONSOLE

Efficiency of movement is critical to keeping operators productive and alert all shift long. The 350 seat is wide and adjustable so operators of any size can work comfortably.

CUSTOMIZABLE JOYSTICKS

Joystick function can be customized through the monitor. Joystick pattern as well as response can be set to match operator preference. All preferences are saved with Operator ID and restored at login.

KEYLESS PUSH START

The 350 uses a keyless push-button engine start. This adds security for the machine by using Operator ID codes to limit and track machine access. Codes can be entered manually, via an optional Bluetooth key fob, or smartphone app.
